# World instability

WEF in Davos:

- ▶ 83% of respondents do not see the possibility to decrease probability of conflicts between nuclear powers
- ▶ 79% of respondents do not see the possibility to decrease probability of local conflicts

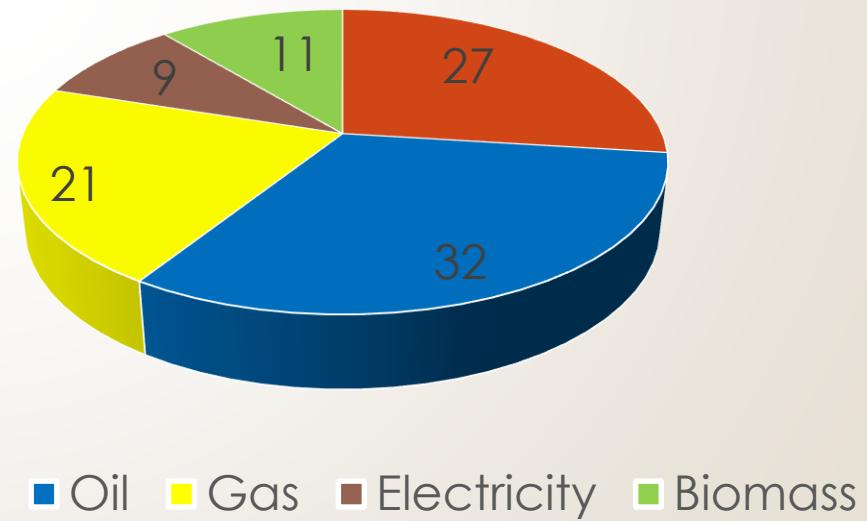

# Possible conflicts

Region	Participants
North Korea	North Korea, USA, Japan, China
South China	USA, China, Taiwan, Vietnam, Filipinos, Malaysia, Brunei
India-Pakistan	India, Pakistan, USA, China, Russia, Iran
India-China	India, China, Pakistan, Iran, Afghanistan, Russia
Middle East	Saudi Arabia, Syria, Iran, Yemen, Iraq, Lebanon, Israel
Baltics	Russia, Estonia, Latvia, Lithuania, NATO
Eastern Europe	Russia, Ukraine, Moldova, Romania, Hungary, Slovakia, Turkey

# Why conflicts develop?

Geopolitical instability is correlated with energy transition stages:

- 1) Coal stage
- 2) Oil stage
- 3) Gas stage
- 4) Renewable stage

# Russian influence

Stable trade routes create trade and political alliances

# Russian gas pipelines

Main direction	Name	Capacity	Start
Russia-Germany	Nord Stream	55	2012
Russia-Germany	Nord Stream – 2 (under construction)	55	?
Russia-Belarus-Poland-Germany	Yamal–Europe	34,7	1999

Turkey	<b>41.91</b>
Ukraine	<b>25.00*</b>
Russia	<b>37.72</b>
Moldova	<b>26.35*</b>

# Russian interfere

- ▶ Czech Republic (the President)
- ▶ Hungary (the Prime-Minister)
- ▶ Germany (former Chancellor)
- ▶ Italy (regional level)
- ▶ Serbia
- ▶ Bulgaria
- ▶ Moldova (the President)
- ▶ France
- ▶ Turkey

# Technology vs energy

# Geopolitical forecast

- ▶ Creation and supporting a safety belt around Russia
- ▶ Stronger media and political intervention using loyal citizens
- ▶ Information confrontation
- ▶ Further attempts to destabilize Middle East to keep high energy prices

# Policy recommendations

- ▶ Countries should pay much more attention to the energy sector as the driving force of all future and current conflicts.
- ▶ The security of BSR highly depends on European decisions, therefore new gas pipelines should not shift energy balance in Eastern European countries.
- ▶ It's recommended to create independent European Energy security center, which can decrease the energy dependence on one country.
- ▶ Countries should stimulate development of RES as it is a guarantee of their security.
- ▶ Political attention should be payed to Turkey, which can provide great instability in case of convergence with Russia and unrest inside country.
- ▶ Relations between the EU and Turkey will have a significant impact on BSR security.
- ▶ Military bases with USA presence must be placed in Eastern Europe to avoid hybrid wars in the nearest future.

# Future research questions

- ▶ If EU countries are ready to new arms race?
- ▶ If EU and BSR countries can resist cyber activity of Russia?
- ▶ If BSR countries can demonstrate real unity taking into account their energy dependence?
- ▶ If Turkey can remain a united country?
- ▶ How to boost economic growth in BSR to stimulate RES?

# Thank you for your attention!
